

Exploring New Features in IBM Lotus Domino 8 Administration (D8720GB)

Format	Classroom
Duration	2.0 Day(s)
Description	<p>Examining the Lotus Domino 8 Environment</p> <ul style="list-style-type: none">- Identifying new Lotus Domino 8 administration features- Classifying new features in Lotus Notes 8 clients- Installing new Lotus Notes 8 clients <p>Implementing New Messaging Features</p> <ul style="list-style-type: none">- Enabling Message Recall- Using Out of Office Service Enhancements- Controlling Inbox Size with Inbox Maintenance- Implementing General Messaging Enhancements <p>Managing Users and Clients with Administration Enhancements</p> <ul style="list-style-type: none">- Implementing New Client Policies- Executing New Client Security Features- Administering Servers with Administration Enhancements <p>Using General Administration Enhancements</p> <ul style="list-style-type: none">- Employing New Server Monitoring Options- Implementing Database Redirection- Applying New Server Security Features- Identifying Integration and Interoperability Enhancements <p>Deploying Composite Applications</p> <ul style="list-style-type: none">- Understanding Composite Application Deployment Fundamentals- Configuring Lotus Notes 8 Clients to Access Composite Applications on a WebSphere Portal Server- Introducing Composite Application Provisioning- Configuring Clients for User-Initiated Updates <p>Migrating an Lotus Domino 7 Environment to Lotus Domino 8 and Lotus Notes 8</p> <ul style="list-style-type: none">- Upgrading Lotus Domino 7 Servers to Lotus Domino 8- Upgrading Lotus Notes Clients to Lotus Notes 8
Audience	This is an intermediate course for Lotus Domino 7 administrators who require early exposure to new Lotus Domino and Lotus Notes 8 features that impact system administration.
Prerequisites	<p>The prerequisites for this course include completion of either of the following Lotus Domino 7 paths or equivalent knowledge, skills, and experience.</p> <p>Administrators who were new to Lotus Domino 7 and</p>

completed the following courses:

IBM® Lotus® Domino® 7 System Administration
Operating Fundamentals (N7D750)
Building the IBM® Lotus® Domino® 7 Infrastructure
(N7D760)
Managing IBM® Lotus® Domino® 7 Servers and Users
(N7D770)

Administrators who upgraded to Lotus Domino 7 from a
previous release and completed the following course:

Exploring New Features of IBM® Lotus® Domino® 7
Administration (N7D720)

Contents

This course covers the changes in the Lotus Domino 8
administration and user environments, including installing
and configuring Lotus Domino 8 servers and Lotus Notes
8 clients, implementing new messaging features,
managing users and clients with administration
enhancements, administer servers using administration
enhancements, deploying composite applications, and
migrating a Lotus Domino 7 environment to Lotus
Domino 8 and Lotus Notes 8.
