

Building the IBM Lotus Domino 8 Infrastructure (D8760GB)

Format	Classroom
Duration	2.0 Day(s)
Description	In this course, you will install and configure a basic infrastructure with a single domain using an existing deployment plan. Students will also set up replication and mail routing in the single-domain environment.
Audience	The target audience for this course is system administrators new to Lotus Domino who are responsible for: Initial installation and setup of a basic Lotus Domino and Lotus Notes 8 infrastructure. Set up of Domino Mail servers in the corporate intranet and extranet (i.e. Internet) environment.
Prerequisites	The prerequisites for this course include completion of : IBM Lotus Domino 8 System Administration Operating Fundamentals (D8750) or equivalent knowledge, skills, and experience
Objectives	Upon completing the course, you should be able to: Install and set up the first Lotus Domino server and administrator Set up servers in the Lotus Domino domain Add Lotus Notes workstations to the Lotus Domino domain Set up the administration environment Set up the replication schedule to synchronize Lotus Domino system databases in the domain Configure intranet Lotus Domino mail routing Configure internet mail routing Enable message controls Enable server and messaging monitoring Troubleshoot common mail setup problems
Contents	Installing and setting up the first Lotus Domino server and Administrator. Configuring internet mail routing - Enabling SMTP routing - Configuring basic and advanced settings for SMTP routing - Restricting mail flow to and from the Internet Enabling message controls - Controlling mail delivery - Setting mail restrictions - Creating whitelist and blacklist filters - Implementing message disclaimers - Enhancing transfer performance - Enabling mail journalling - Understanding how mail rules are executed

- Creating mail rules
- Stopping the processing of mail rules
- Using the blacklist tag and whitelist tag mail rule conditions
- Establishing mail quotas
- Archiving mail using policies
- Controlling Inbox size

Enabling server and messaging monitoring

- Testing mail routing
- Enabling message tracking
- Monitoring mail delivery and mail statistics
- Enabling message recall

Troubleshooting common mail setup problems

- Testing mail connections
- Restarting the Router
- Forcing mail to route
- Managing dead and undelivered mail
