

Wide Area Application Services V4.0

Summary / Objectives

WAAS is a 3-day, instructor-led, lecture/lab course that teaches you about the business value of WAN optimization and application acceleration technologies. You will learn how to design a basic WAAS deployment and configure WAE devices, including traffic optimizations and file and print services.

In the lab, you will install and configure WAE devices, configure and test application traffic policies, and configure file and print services.

Who Should Attend:

- Channel Partner / Reseller
- Customer
- Employee
