

Workflow Fundamentals

2 days

Delegates:

This course is designed for Functional Implementers who need to learn how to modify the Oracle Workflows embedded in the Oracle E-Business suite.

Objectives:

By the end of this course, delegates will be able to identify the components of Workflow and understand the Workflow Directory Service. They will learn how to design a simple workflow and save it to the database.

Delegates will also learn how to define, test and monitor workflow processes; and how to retrieve embedded workflows, modify the workflow processes and load them back to the database.

Topics Covered:

- 11i/2.6 E-Business Functional Workflow Overview
- Oracle Workflow Components
- Plan a Workflow Process
- Diagram a Workflow Process
- Define Item Type Attributes and Lookup Types
- Define Messages and Notification Activities
- Test and Monitor Workflow Processes
- View and Respond to Notifications
- Oracle Workflow Directory Service
- Workflow Engine
- Customize Workflow Processes
- Handle Errors
- Workflow Loaders

Requirements:

11i Navigation.

Knowledge of the Procure to Pay and Order to Cash processes would be advantageous.

Follow-On Courses:

- 11i System Administration
